

**We're the tape
manufacturer that
everyone is
talking about.**

Well almost everyone.

The word is out! Specialty Tapes Manufacturing is the go to resource for engineered tape products that can replace mechanical fasteners, protect exposed surfaces or splice two substrates together. We solve the challenges of your most difficult tape requirements.

About Us:

Specialty Tapes Manufacturing is a world class adhesive tape manufacturer that uses state-of-the-art coating equipment to produce high performance and environmentally compliant tape products. Once we learn about and understand your specific needs, we'll deliver a high quality and affordable solution. Let's get started!

Applications:

A few of the applications our products are used in include:

- Lens and surface protection
- High temperature masking
- General assembly
- Electrical insulation
- Indoor and outdoor bonding
- Industrial fabrication bonding
- Splicing

Check out our complete capabilities, research qualifications and other specifications on the backside.

Capabilities, Research Qualifications and other specifications.

At Specialty Tape Manufacturing, we excel in three critical areas:

- High performance single coated acrylic and silicone pressure sensitive tapes
- High performance acrylic and silicone transfer tapes
- Double coated acrylic and silicone tapes for low surface energy substrates

Our focus on these core competencies increases development and production efficiencies which lead to reliable and affordable solutions that meet your needs.

Capabilities

Our manufacturing facility is capable of producing tape solutions that meet or exceed your needs. We can provide the following:

- 22" wide pilot coating
- 60" wide production coating
- Clean room coating. 1,000 class
- Standard and custom adhesive formulations
- Corona treatment
- Zone coating
- Release liners and release coatings
 - Silicone
 - Non-silicone
- Solvent-based PSA systems
 - Silicone
 - Acrylic
 - Rubber
 - Thermosetting acrylics & rubbers
- Multi-Layer Constructions
 - Monolayer
 - Single sided
 - Double sided

Research and Development

The Specialty Tapes Manufacturing R&D team has a solid track record of designing adhesive systems specific to customers' technical requirements. Our laboratory services include:

- Rapid response custom hand sheet samples
- FTIR for chemical property identification
- Age testing
- PSTC testing (tack, shear, peel, etc.)
- Physical and mechanical substrate evaluations
- Humidity testing
- Outdoor environmental testing

Converting and Packaging

No matter how you need your products packaged, our facilities can produce and deliver products the way you want them. Specialty Tapes

Manufacturing's centralized location (Wisconsin) makes shipping to multiple national locations cost-efficient.

- Knife slitting
- Slit/rewind
- Logging
- Clean room slitting and rewinding available
- Core diameter 1", 1½", 3" & 6" ID
- Plastic or cardboard blank core
- Custom printed core
- Barcode labels
- Shrink wrapping machine
- Worldwide shipping expertise

Certification and Specifications available upon request

- ISO 9001:2000 certified – certificate available by email
- RoHS specifications available
- MSDS specifications available
- C.O.A. (certificate of analysis)
- C.O.C. (certificate of compliance)
- NAFTA certificates
- REACH compliance

Although we manufacture a large number of standard products, we welcome the chance to meet your specific application needs by developing custom products. Click the Links below for more information:
